

AUZRED XB 2017 SIRE DIRECTORY

Welcome to our 2017 Sire Directory:

The Montbeliarde breed continues to grow in France, 435000+ cows were under herd test and included in the latest 2014 French statistics, an increase of 16000+ cows from 2012.

Considered a minor breed, to put the size of the Montbeliarde breed into perspective, Australia had a total of 493000+ cows from all breeds in the herd test averages. 315000+ of the cows being Holstein.

This large population of Montbeliarde cows under herd test in France adds to the strength of the Coopex Genomic program, and with previous genomic sires, CRASAT, ELASTAR, GALAGO and FAUCITRE becoming top proven sires, confidence in the Coopex Genomic sires continues to grow, and Auzred Xb's ability to select from a growing list of genomic sires that we believe will suit Australia continues to increase.

Strong Montbeliarde team:

Our 2017 team of Coopex Montbeliarde sires is, we believe, the strongest and best value team of Montbeliarde sires available in Australia to date.

ELASTAR, world No. 1 ranked sire leads the team, new sires in spring 2016 **HUMMER**, **GALAGO**, **HOKAHOU**, **HAFIZ** and **HARVEY** proved very popular with **GALAGO**, **HOKAHOU** and **HARVEY** being great value.

New sire **ITALIC ISU 156**, **A2A2** and **Udders 127**

If you want fantastic Udders, look no further than our new sire for 2017, **ITALIC ISU 156**, **Udders 127** Type 115, CC +1.9, Survival +1.3, MS 114 and Temp 111, a sire with lots more to offer other than amazing Udders.

A2A2 Montbeliarde Sires

With the growing demand for A2A2 sires, Auzred Xb now has 6 sires, **ELASTAR**, **ITALIC**, **FAUCITRE**, **CRASAT**, **HAFIZ** and **HARVEY** that are A2A2, giving you a large choice of sires to select from.

Auzred Xb Aussie Reds

Auzred Xb sires **CJ**, **BLACKWOOD**, **COMMODUS**, **FONTERRA**, **MAXIMUS** and **TOPDECK** now have daughters in milk and adding to their December ADHIS proofs. Farmer reports are all very positive and adding to the confidence of farmers to use Aussie Reds in their breeding programs.
