

# AUZRED XB 2015 SIRE DIRECTORY

Welcome to our 2015 Sire Directory.

Two exciting new genomic Montbeliarde sires GNOCCHI and FICASTONE have been added to the team, plus both HARPER and GUISSNEY are now available in conventional semen.

GNOCCHI is an outcross sire by Dombinator and his grand sire is Papayou who was one of the best longevity sires, Papayou Australian daughters are now into 7<sup>th</sup> lactation with a very high proportion still milking, Steve is yet to cull any of his. GNOCCHI has high daughter fertility @ +1.3 and fantastic CE of 93

FICASTONE is a very high profile Urbanitse son and the “complete package”, check him out!

This season Steve plans to use GNOCCHI, FICASTONE, HARPER and ELASTAR in his spring mating program. Conventional semen of HARPER will be used over some of his maiden heifers. Aussie Red sires JAMAR and CJ will also be used over the maiden heifers. Any cow that is due to be mated back to HF will be mated to WYNSOR & MAELSTROM.

Semen is now available from all 5 of our new Team 2015 Elite young Aussie Reds. These young sires can be used with confidence.

Use them in the Monty or Monty/Holstein packs to get your Monty and Holstein semen at the best price.

Four Holstein sires, STRAVAGANZA, PASCAL, WYNSOR and MAELSTROM have been added to our sire directory, selected for efficiency and ideal for crossbreeding.
