

AUZRED XB APRIL 2014 UPDATE

.....**AXBGladiator Now Available**.....
.....**Coming soon, 7 Exciting New Coopex Montbeliarde sires**.....

95500+ Litres and going strong!!!

AXBTopdeck(VFoske x Stensjo), The Dam of AXBTopdeck **Bosgowan Primula 334** has now clocked up in excess of 95564 litres, and is again in calf, being preg. tested in calf with twins!

Bosgowan Primula 334 was previously, the highest genetic merit Aussie Red cow ever selected as a bull dam, with an ASI of 130. She has amazing longevity being born in 2000, and now in her 14th year. She is an extremely efficient, medium sized cow with no vices, and the perfect type of cow that any commercial dairy producer would love to milk.

Having the distinction of already producing a top Australian proven Aussie Red sire in ARBLippman, Bosgowan Primula 334 has proven our faith in selecting her again as a bull dam with her amazing longevity, fertility and production.

AXBTopdeck now has plenty of semen in stock for those wanting to use him in autumn.

AXBGladiator (VFoske x Torp882) is now available. The long wait for semen from this highly sort Elite young sire is finally over! This half-brother of the No.1 Aussie Red sire, ARBBonjovi has been in high demand with pre availability orders for autumn.

His Dam, Bosgowan Primula 278 Ex 91, has proven to be one of the Aussie Red breeds best ever bull dams to date. Passing away in her 13th lactation, longevity, fertility, Type and high components were all features of this cow. With production to 464 kg B/fat @ 5.1% and 334 kg Protein @ 3.7% in 305 days, components and high positive deviations combined with Ex 91 for overall Type made her one of the breeds highest profile cows.

GLADIATOR's sire V Foske offers extreme positives for Fertility, Longevity, Hoof Health and Protein Kgs, and we believe he was an obvious choice to use as his sire, to produce a bull best suited to our pasture base and payment system.

AXBBlackwood (ARBBonjovi x Fynaks), now has good stocks available. Being bred at the No.1 rated Aussie Red herd of Jan Raleigh's and from what Auzred Xb consider to be one of the best families from the herd, Blackwood is an Elite young sire that should not be over looked.

Sexed Semen;

We have had enquiry for sexed semen from our Elite young Aussie Red sires, yes it is possible for us to supply sexed, but produced to order only. RRP \$55+gst

Interestingly Coopex only produce sexed semen from their top couple of genomic sires and produce sexed and conventional from the rest, this method ensures a higher number of daughters in their first proof.

If you would like to try some sexed, please let us know ASAP.

Future Bull Dam Breeding Programs:

Auzred Xb is expanding its Contract Breeding Program in 2014 in preparation for Genomic selection of future Elite Young Aussie Red sires.

Don't underestimate those elite cows in your herd! Regardless of breed, they may be exactly what we are seeking to begin a breeding program to eventually produce that Elite Aussie Red sire of the future.

Regardless of Breed, if you:

- Have a good history of Herd Testing
- and good Cow ID and pedigree history
- and would like the challenge of having a very Elite but small group of pure Aussie Red cows bred in your herd as future possible bull dams, then let Steve know.

We are selecting future possible Aussie Red bull dam lines to breed, beginning from either Holstein, Jersey or first cross (Red-cross) cows that are excelling in commercial dairy herds. These elite cows are currently being identified, with the breeding programs for these newly identified elite cows commencing in their next mating period.

A number of Aussie Red sires including ARBBonjovi, ARBFrosty, ARBPostie, ARBRalph, and ARBRunner all had Holstein sired GGGDams.

You never know, that Elite young Aussie Red sire of the future may come from your herd. Give Steve a call to organise a visit to begin this exciting venture in your herd.

AuzredXb produces amazing new Elite Young Aussie Red Sires.

Australia's highest ever genetic merit team of Elite Young Aussie Red Sires were born in the 2013 Spring, as a result of the contract breeding programs that AuzredXb has embarked on.

The chart below shows the average ABV's of these young contracted bulls dams compared to AuzredXb's current team of young sires and the Australian Red Dairy Breed average.

Average ABV's	APR	ASI	Litres	Protein kg	B/Fat kg
2013 born contracted Bull's Dams ave ABV	233.5	175	+651.4	+25.5	+33.3
AuzredXb current Bull Team Dams ave ABV	156	108.7	+567	+17.3	+27.7
Australian Red Breed	38.5	23.6	+86.2	+3.3	+5.2

Clearly these contra

cted young sires, born in spring 2013 are genetically in a league of their own compared to any previous team of young Aussie Red Progeny Test sires.

The Contracted Elite young sires born in spring 2013 are;

Bull 1/ **AXBJamar**, (Lippman x Peterslund) is from the No.1 ABV Aussie Red cow in the August 2013 ADHIS results. APR 242, ASI 157, +20 kg P @ +0.22% and +29 B/fat @ +0.22%. You can trace back ten generations exceeding their predicted ABV's. Fantastic cow family.

Bull 2/ **AXBRed Mile**, (ARBLex x Peterlsund) from the NEW No.1 ABV Aussie Red cow in the latest April 2014 ADHIS results, APR 243, ASI, 152, + 18 kg P @ 0.15% and +37 B/fat @ 0.30%

She has done 10268 lts 378 kg pro @ 3.7% in 305 days.

Bull 3/ **AXBMt Schank**, (VR Cigar x Lippman) from the No. 4 ABV Aussie Red cow, APR 226, ASI 192, +33 Pro @ +0.16% and + 23 B/fat

She did 306 kg pro @ 3.8 on first lac. and 10663 lts, 388 kg pro on second lac.

Bull 4/ **AXBAotearoa**, (Eik x Syd Frem x Orraryd), APR 236, ASI 179, +28 pro and + 37 B/fat. This family has 4 generations still milking in the herd, and with his half-sister due to calve in August, we expect the unprecedented result of having 5 generations milking! Longevity, Fertility, Production and Type in this family are exceptional.

We have two other young bulls that we have just put a contracts, **AXBShawschank**, from an Ex 91 cow that has done 12297 lts @ 3.8% pro and 4.4% b/fat and has a great depth of pedigree and,

AXBRufus, (ARBLex x Redviking x Vest Delta) from one of the best cow families in the very low input system at the Loden Aussie Red Stud of Michael Riggs, the

Plenty for us to be excited about as we move towards supplying a team of top proven Aussie Red sires to both Australian and International dairy farmers.

Confidence in Auzred Xb's current team of Elite Young Sires is high, with our first exports going to Asia and NZ.

Placing high priority on the maternal line as well as the sire line, inspection of all cows associated with the maternal line, plus Udders, F&L's, Temp, High production, Health and Type all feature strongly in Auzred Xb's selection process to breed the next generation of Elite young Aussie Red sires.

Expectations are already buzzing about this next team of Elite Young Aussie Red sires that were born in spring 2013, and like our current team, are perfectly suited to both crossbreeding and Red breeders, with zero or minimal Holstein content.

Find out more about our Aussie Red sires on our website at <http://www.auzredxb.com.au/>

Our **Elite Young Aussie Red** sires @RRP \$12 are just \$10 in this pack offer and the Coopex Montbeliarde sires are even better priced than in the 50 + Unit Coopex Montbeliarde pack

CoopexMontbeliarde update:

REDON ISU 150 RRP \$28 Now with 33567 daughters in his proof is one of the breed's most influential and popular sires. His Australian daughters continue to impress.

Production, Type 117, Udders 118 and a breed leader for Udder health and Longevity

Fantastic value @ \$25 in our 50+unit pack or just \$24 in the 1 for 1 50+unit pack.

SOLSTICE RRP \$18, on special at **\$14** in the 50+ unit pack offer, or just \$12 in our 1 for 1 50+ unit pack, continues to be one of our highest selling sires.

Australian dairy farmers continued to give glowing reports about him, and he continues to be a high demand sire due to his daughter's exceptional performance in our pasture based systems. We selected SOLSTICE as a pasture based specialist with the added bonus of BB kappa casein, he has more than lived up to our expectations. His daughters are medium sized and far more dairy than most expect the Montbeliarde to be. Very quiet, with great udders and production. SOLSTICE has also become popular for use over maiden heifers due to his calving ease.

This is tremendous value for a **proven** Montbeliarde sire. SOLSTICE is suitable to mate over any breed of cow with confidence.

UDOM, RRP \$18, now on special at **\$16** in the 50+unit pack and **\$15** in the 1 for 1 pack. His first Australian daughters are milking and are very impressive. UDOM gives you the opportunity to purchase a well-balanced **proven** Montbeliarde sire at a great price. Fantastic temperament at 119, milking speed 118, feet & legs 116, plus Production and Type. UDOM will also increase teat length.

UBAC, also now has Australian daughters milking, very tidy looking cows. **RRP \$18**, now on special at **\$16** in the 50+unit pack and **\$14** in the 1 for 1 pack Fantastic Type at 111, Udders 114, Feet & Legs 115. Calving Ease at 91 One of the best for calf Vitality at 94. UBAC is a son of the famous MICMAC and an excellent all round sire with the added bonus of the BB kappa casein gene!!

USSAGE RRP \$18 A2A2 & BB Kappa Casein With a Body Composite score of 85 his daughters on average are 15% smaller than the breed average for size. Easy calving at 90, great Feet & Legs 114, Very good Udders 108, Rear Udder width 121 and Temp 107 with the added bonus of being both A2A2 and BB kappa casein this sire a very good choice.

TIMOR RRP \$18 His Australian daughters are very popular and continue to prove that he is the pasture based specialist that has made him so popular in over 30 countries. He is great value @ **\$16** in the 50+unit pack and just **\$15** in our 1 for 1 pack.

**Due to import delays beyond our control,
these new sires are now expected in June/July**

.....**Coming soon, 7 Exciting New Coopex Montbeliarde sires**.....

We apologise for any inconvenience with the delayed arrival of these 7 exciting new sires. The new sires will be the strongest line-up of Montbeliarde sires available to date in Australia and embellish the strengths that our clients have been asking for.

3 new Proven sires BRINK ISU 158 , CORTIL ISU 147 and TRIOMPHE ISU 142

And 4 new Genomic Sires: HARPER ISU 164, GUISSENY ISU 162, FETARD ISU 157, FAUCITRE ISU 154

BRINK ISU 158 (Papayou / Joblandin / Embrun)

Son of Australian highly successful sire Papayou, one of the breeds best for CE, Fertility and **Calf Vitality. A high production sire +813 with great Type 118, Udders 116, F&L 113 and Temp. 117**

CORTIL ISU 147 (Piombo / Linou / Gardian) *Outcross sire.*

High Production sire +982 lts, +28 pro and +31 bfat, with fantastic Temp.125, very good Type 109, Udders 110 and F&L 111. Has 264 daughters in his production proof and a very popular sire in France, Cortil will be jointly marketed with CRV

TRIOMPHE ISU 142 (Lecuyer / Gardian / Bois Levin) *6788 Daughters in his proof!*

Type 124 and Fertility +1.1 specialist with big production +982 lts. Has the best rating for F&L's @ 123 and Udders 118

Genomic Sires, HARPER ISU 164 and GUISSENY ISU 162 are the No.1 and 2 genomic sires in France and are available *only* in sexed semen.

Genomic Urbanitise sons FETARD ISU 157 & FAUCITRE 154 complete our new high genetic merit team. Fetard will also be jointly marketed with CRV

Coopex distribute their young genomic sires the same as their progeny test sires to ensure reliable unbiased proofs, it is not until their genomic sires have calves on the ground do they make them available to the public. This process also ensures that the Coopex genomic sires Calving Ease and Calf Vitality scores are highly reliable.

Find out more about these New Coopex Montbeliarde sires on our website at

<http://www.auzredxb.com.au/>

Cheers

Steve and Karen
